SUMMARY

I am a MERN Stack developer seeking a challenging position in a reputable company to expand and utilize my skills, training and knowledge.

EXPERIENCE

DocXvision   10/2023 - 12/2023
Freelancing Work ↗

This is a Freelancing Project of Dynamic Document Data extraction and Analysis. We worked in a team with 2 years of experience and I was handling the front-end and connectivity of the project.

- worked with the Next.js framework of React.
- handling the issue in routing pages.
- use Framer motion to enhance the look and add some animations in the web page.
- Deals with the APIs.
- understand the client's requirements within one conversation.

TUG - The Ultimate Garments an E-Commerce website   07/2023 - 10/2023
Project Work ↗

This is the E-commerce website built in React named (TUG - The Ultimate Garments). I developed and implemented JavaScript React functional components, resulting in a 40%

improvement in website load time and enhanced user experience.

- The administration part is separated from the user interface. used JWT tokenization and authentication.
- Implemented CORS for backend connectivity, ensuring secure and efficient data transfer between server and client.
- Ensuring CURD operation in Redux.
- Applied Axios method of POST/GET. write the SQL queries for the CURD operations.
- Part of building mobile application components for the user interface by React native.

React Js & Node.js   06/2023 - 12/2023
Numeric Infosystem Pvt ↗

- Had been a part an e-commerce website that has a product interface, cart area and payment gateway method.
- Command over developing React JS components with responsive user interfaces.
- Dealt with the Node.js backend connectivity via CORS and traversed data from frontend REACT to backend with the use of Axios methods.
- Know how to deal with the restful APIs.
- Worked on the connectivity of the backend to a database of MySQL Workbench.
- Know the basics of SQL Queries.
